EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carmen C. Cook on 11/20/2007.

The application has been amended Claim 11 as follows since claim 10 is already cancelled:

11. (Currently amended) The device of claim ~~10~~ 22, wherein digital input value comprises a digital voltage value in an arbitrary unit generated by an analog-to-digital converter and the second unit comprises a Decibel unit.
2. Claims 1-2, 8, 10, 12, 14-15, and 19 are cancelled.
3. Claims 3-7, 9, 11, 13, 16-18, and 20-23 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of method and device for performing a numerical value conversion in a natural unit of physical measurement comprising: a memory having stored thereon a look-up table for providing a selected coefficient pair of slope and offset coefficients using an index parameter; a

multiplexor coupled to receive a first parameter and a second parameter, the multiplexer receiving a select signal for selecting one of the first parameter and the second parameter as the indexing parameter; and an arithmetic logic unit wherein the first parameter comprises an operating temperature and the second parameter comprises a most significant k bits of a received power parameter where k is less than N along with other features cited in independent claims 13 and 22.

The closest found prior art is Kelly (U.S. 5,942,992). Kelly also discloses a natural unit of physical measurement conversion comprising: a memory unit and an arithmetic logic unit. However, Kelly fails to explicitly disclose a multiplexor coupled to receive a first parameter and a second parameter, the multiplexer receiving a select signal for selecting one of the first parameter and the second parameter as the indexing parameter wherein the first parameter comprises an operating temperature and the second parameter comprises a most significant k bits of a received power parameter where k is less than N as seen above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chat C. Do whose telephone number is (571) 272-3721. The examiner can normally be reached on Tue-Fri 9:00AM to 7:30PM.
